## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2-15-05 has been entered. Claims 19-36 are currently pending.

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or disclose or make obvious a method of transferring and converting data between a chip and a chip package, wherein said chip is physically coupled to said chip package and electromagnetic signals are transmitted between said chip and said chip package, and therefore, no electrical connections are necessary.

Applicant's prior art discloses the necessity for a chip and a chip package to be physically and electrically interconnected (p.1 – Background).

Sudo (5,198,684) in view of Nhu (5,237,441) disclose a similar method, except the chip of Sudo is physically coupled to a structure other than the chip package (Figs.1,2).

Ouchi (6,477,286) discloses a similar method wherein an optoelectronic chip is physically coupled to a substrate in order to transfer and convert signals (Fig.3). However, said substrate does not contain any chips, and therefore, cannot be called a chip package.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
